Once KidsCare gets your completed application, including the proof, the application will be reviewed as soon as possible. If a family/child qualifies for AHCCCS, the application will be sent to the Department of Economic Security (DES) and they may ask you for more information. You may also apply for other benefits through DES, including Food Stamp assistance.

Can Parents also apply for health insurance?

Parents may also qualify for health insurance. KidsCare parents must pay a premium in addition to the amount billed for the child's coverage. When one or both parents and child are enrolled they must pay a "Family Premium" based on household size and income. For example, a family of four making \$3200.00 a month before taxes would pay a monthly premium of about \$160.00. The application requirements for parents are the same as for children and a parent can only be covered as long as their child is enrolled.

Does applying for or being a member of KidsCare or AHCCCS affect immigration status?

No. Applying for KidsCare for your family will not affect anyone's immigration status and a parent's social security number is not required when only a child is applying for coverage.
